DETAILED ACTION

Response to Amendment

1 Applicant amendment overcomes §102(b) rejection of claims 1-6, 8, 9 and 11-14 and the rejection is withdrawn.

Applicant amendment overcomes objection to claims 7, 10, 13 and 14 and the objection is withdrawn.

Allowable Subject Matter

2 The following is an examiner's statement of reasons for allowance:

Claim 1 recites, in part, "correlating the recorded angular position and the sensor device increments; and saving the correlation of the recorded angular position with the sensor device increments". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claims 2-10 depend from claim 1.

Claim 11 recites, in part, "a storage unit for saving a correlation of the rotor angular position and the sensor device increments, and a control unit for motor control according to the sensor device output signals and the saved correlation". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claim 12 recites, in part, "a storage unit for saving a correlation between the commutation instances and sensor device increments". This feature in combination with the remaining claimed structure avoids the prior art of record.

Claims 13 and 14 depend from claim 12.

It is these limitations, which are not found, taught or suggested in the prior art of record, and are recited in the claimed combination that makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
